

Invify General User Manual

Getting Started, System Settings, Core Features & Admin Web Cloud Dashboard

Welcome to the **Invify General User Manual**. Invify is a next-generation enterprise business management suite built with an **offline-first architecture**, hardened idempotent financial ledger, local peer-to-peer (LAN) synchronization, and seamless cloud replication. This handbook covers the complete **Getting Started Onboarding, All App Settings & Customizations**, and the **Admin Web Cloud Portal**.

❖ Quick-Start Sequence (First-Time Installation & Onboarding)

1. Initial Launch & Business Mode:

Open Invify on your tablet, POS terminal, or PC. Choose your business operating model (

Retail

,

School

, or

Services

).

2. Organization Profile:

In *Settings*, enter your official Business Name, Phone Numbers, Email, Physical Address, and upload your Brand Logo/Crest.

3. Currency & Financials:

Set your local Currency Symbol (₦, \$, £, €, KSh, etc.) and configure your default Tax/VAT rates.

4. Security & PIN Setup:

Change the default Manager PIN, create Cashier/Staff accounts, and configure the Emergency Lock Screen passcode.

5. Hardware Pairing:

Connect your Bluetooth/USB thermal receipt printer and card reader in *Printer & MPOS*.

6. License Activation:

Enter your Pro activation key or sync your device with the Cloud Admin Portal.

Table of Contents

- 1. System Architecture & Offline-First Engine
- 2. Getting Started & Initial Setup Wizard
- 3. Complete System Settings Reference
- 4. Security, Staff Roles & Emergency Lock
- 5. Business Operating Modes (Retail, School, Services)
- 6. Printers, MPOS & Peripheral Setup
- 7. Multi-Till Peer-to-Peer LAN Synchronization
- 8. Admin Web Dashboard & Cloud Portal
- 9. Quaser Gateway, Virtual Accounts & Payouts
- 10. Database Backup, Snapshot & Disaster Recovery
- 11. Standard Operating Procedures (SOPs)
- 12. Master Troubleshooting Matrix & FAQ

1. System Architecture & Offline-First Engine

Invify is engineered to guarantee 100% uptime, even during internet outages, network blackouts, or server maintenance.

Offline-First Idempotent Ledger

Every transaction, invoice, result score, or payment is recorded locally into an encrypted, immutable database before any network call. Transactions are never dropped or double-counted.

Local Area Network (LAN) Peer Sync

Multiple cashier terminals, bursary tablets, or sales counters synchronize in real-time over a local Wi-Fi router without requiring an active internet connection.

Real-Time Cloud Replication

When internet is available, transactions automatically mirror to the **Invify Cloud Platform** for multi-branch monitoring, automated bank reconciliation, and remote web access.

Enterprise Security & Audit Trail

All administrative adjustments, price changes, refunds, and permission elevations are permanently recorded in the system audit log with operator timestamps.

2. Getting Started & Initial Setup Wizard

Follow this comprehensive onboarding flow when launching Invify on a new terminal:

STEP 1: SELECTING YOUR OPERATING MODE

Invify adapts its user interface, workflows, and terminology to your industry:

- **Retail Mode:** Supermarkets, boutiques, pharmacies, electronics, grocery, and wholesale stores.
- **School Mode:** Nursery, Primary, Secondary, High Schools, Colleges, and educational academies.
- **Service Mode:** Tailoring, repair workshops, salons, professional consultancies, and maintenance services.

STEP 2: BUSINESS IDENTITY & BRANDING

Configure official store metadata that appears across invoices, thermal slips, and cloud portals:

- **Organization Name:** Official registered trade name.
- **Logo / Crest:** Upload a high-resolution PNG/JPG image (used on receipts, report cards, and watermarks).
- **Contact Details:** Phone numbers, email, physical address, and website.

STEP 3: FINANCIAL & HARDWARE CALIBRATION

Set up currency, tax rules, and receipt printing:

- **Currency Symbol:** Select your currency (e.g. ₦ Naira, \$ USD, £ GBP, € Euro).
- **Printer Pairing:** Open *Printer & MPOS*, tap scan, pair your Bluetooth/USB receipt printer, and run a *Test Print*.

3. Complete System Settings Reference

The **Settings** module () provides granular control over operational parameters. Access is PIN-protected.

Setting Category	Configurable Options	Operational Impact
Business Information	Name, Phone, Email, Address, Website, Logo Upload	Prints on thermal receipts, A4 invoices, student report cards, and displays on the dashboard header.
Business Mode	Retail / School / Service Selector	Switches dashboard tile layout, terminology, and specialized sub-menus.
Custom Terminology	New Sale Label, Stock Label, Sales Records Label, Items Label	Allows full customization of button labels to match store jargon (e.g. "NEW BILL", "FEES", "WORK ORDERS").
Appearance & Display	Theme Mode (Light / Dark / System), Live Clock, Sync Indicators, Background Logo Watermark	Optimizes screen contrast for indoor cashier desks or outdoor bright light conditions.
POS & Printing	Thermal Size (58mm / 80mm), Auto-Print on Checkout, Receipt Header, Return Policy Footer, Show Barcodes	Controls receipt formatting, font scaling, automatic paper cutting, and legal disclaimers.
Tax & Currency	Currency Symbol, Currency Code, Default Tax/VAT Rate (%)	Enables automatic tax calculation on checkout and formats monetary values across ledgers.
Network & Cloud Sync	Online Sync Toggle, Auto Upload Invoices, WebSocket Realtime Engine, Master/Client LAN Mode	Manages bandwidth usage, local LAN peer sharing, and cloud data replication frequency.
Database & Maintenance	Export Backup JSON, Restore Snapshot, Clear Cache, Reset All Local Data	Critical for manual offline disaster recovery, terminal migration, and memory optimization.

4. Security, Staff Roles & Emergency Lock

Multi-tiered role-based access control (RBAC) ensures strict separation of duties and eliminates unauthorized ledger modifications.

User Role Hierarchy

- **Super Admin / Proprietor:** Full system control, Quaser payment keys, database restore, license management.
- **Manager / Admin:** Price overrides, discount authorization, stock valuation, inventory restock, refunds.
- **Finance / Bursar:** Fee collections, bank reconciliation, debt ledgers, payment matching.
- **Cashier / Teacher:** Standard POS checkout, student result entry, lesson notes (no financial settings access).

Emergency Lock Screen

In case of emergency, physical security threats, or unauthorized terminal tampering, activating the **Emergency Lock** immediately freezes all screens behind a secure master passcode. No sales, refunds, or customer data can be accessed until unlocked.

5. Business Operating Modes Overview

A single Invify installation can seamlessly run across three industry verticals:

Operating Mode	Key Features & Modules	Target Establishments
RETAIL MODE	Barcode checkout, Stock Restocking, Inventory Valuation at Cost vs Retail, Category Management, Customer Debt Ledgers, Gross Profit Analytics.	Supermarkets, Boutiques, Electronics, Pharmacies, Hardware, Wholesalers.
SCHOOL MODE	Academic Years/Terms, Class Arms, Student Profiles, Fee Management, Batch Billing, Result Entry (CA1/CA2/Exam), Auto Grading, Lesson Notes AI Wizard, Dedicated Virtual Accounts.	Creches, Nursery, Primary, Secondary, High Schools, Colleges, Training Centers.
SERVICE MODE	Job Work Orders, Material vs Workmanship Cost Separation, Service Status Lifecycle (Pending → Progress → Ready → Delivered), Client Service Ledgers.	Automotive Repair, Tailoring, Salons, Engineering, Consultancies, Maintenance.

6. Printers, MPOS & Peripheral Setup

Invify is compatible with industry-standard POS hardware, barcode scanners, and peripheral accessories.

Thermal Receipt Printers

Supports **58mm** (compact) and **80mm** (standard) ESC/POS printers over **Bluetooth**, **USB OTG**, or **LAN Network (TCP/IP)**. Built-in thermal printers on Android POS devices (Sunmi, POSIFLEX, Telpo) are natively supported with instant paper cutting.

MPOS Card Readers & Scanners

Pair wireless MPOS debit card terminals for in-person card payments. USB and Bluetooth laser/2D barcode scanners require zero configuration—simply scan any product barcode to instantly add it to the cart.

7. Multi-Till Peer-to-Peer LAN Synchronization

Scale your store or school across multiple checkouts and offices without relying on cloud internet:

How to Set Up Multi-Device LAN Sync (No Internet Needed)

1. Connect all terminals (tablets, phones, PCs) to the same local Wi-Fi router or mobile hotspot.
2. Designate the main terminal as the **Sync Master**
(in *Settings* → *Device Sync*).
3. On other cashier/teacher terminals, tap **Join Master**
. The devices will discover each other automatically via local mDNS/IP broadcast.
4. All sales, student bills, stock deductions, and payments will now sync across all screens in real-time.

8. Admin Web Dashboard & Cloud Portal

The **Invify Cloud Admin Portal** enables proprietors, executives, and multi-branch managers to monitor and govern operations from any web browser worldwide.

EXECUTIVE CLOUD METRICS & MULTI-BRANCH CONSOLE

Real-time centralized governance from any computer or mobile browser.

- **Global Turnover Dashboard:** View live revenue aggregated across all branches and physical terminals.
- **Remote Product & Price Updates:** Add new items, update cost/selling prices, or adjust class fee structures on the web—changes push automatically to physical tills.
- **Consolidated Profit & Loss:** Download comprehensive P&L reports, tax statements, and inventory valuation summaries in Excel, CSV, or PDF.
- **Live Multi-Terminal Tracking:** Monitor cashier active status, battery level, offline queue count, and shift closing balances remotely.

STAFF AUDIT TRAILS & CENTRALIZED USER MANAGEMENT

Oversee all administrative actions across your enterprise.

- **Remote Staff Management:** Create cashier, bursar, and manager logins, assign roles, or remotely revoke terminal access.
- **Administrative Audit Trail:** Review every discount granted, refund processed, price override, or deleted invoice with operator timestamps.

9. Quaser Gateway, Virtual Accounts & Payouts

Automate incoming bank transfers and eliminate manual teller confirmation using integrated payment rails.

Dedicated Dynamic & Static Virtual Accounts

Generate unique, dedicated bank account numbers for students or commercial clients. When a transfer is made, the Invify engine reconciles and credits the ledger automatically in seconds.

Automated Bank Settlements & Payouts

Collected funds settle directly into your registered commercial bank account. Track payout batches, platform settlement fees, and transfer reference IDs under *Payout History*.

10. Database Backup, Snapshot & Disaster Recovery

Protect your institutional data against hardware loss, device theft, or physical damage.

OFFLINE DATABASE SNAPSHOTS & CLOUD BACKUPS

Maintain complete data independence with portable encrypted backups.

- **Creating a Local Backup:** Go to *Settings* → *Database* → *Export Backup*. Save the encrypted JSON file to an SD card, USB drive, or secure email.
- **Restoring to a New Device:** Install Invify on the new terminal, go to *Settings* → *Database* → *Restore Snapshot*, and select your backup file. All products, sales history, student profiles, and ledgers restore in seconds.
- **Automated Cloud Backups:** For Pro/Standard connected devices, daily encrypted snapshots are automatically preserved in the Invify Cloud.

11. Standard Operating Procedures (SOPs)

Recommended operational workflows for peak efficiency and error prevention.

Daily Cashier / Operator Workflow

1. Log in using your assigned Staff PIN.
2. Verify that the receipt printer status is active (Green dot on tile).
3. Count and confirm your opening cash drawer float.
4. Issue receipts for every transaction; record exact payment methods.
5. At shift end, print the **Transaction History** summary and balance physical cash against recorded totals.

Weekly Manager Maintenance Routine

1. Audit the **Low Stock** and **Defaulter** lists.
2. Review the **Reconciliation Hub** to resolve any unallocated transfers.
3. Perform an offline **Database Backup** and save to external storage.
4. Inspect the **Audit Logs** for unauthorized voids or overrides.

12. Master Troubleshooting Matrix & FAQ

Symptom	Underlying Cause	Recommended Solution
Printer not printing / Red dot	Bluetooth unpaired, thermal paper roll inserted backwards, or printer sleep mode.	Ensure paper feeds from under the roll, power cycle printer, open <i>Printer & MPOS</i> and tap <i>Connect</i> . Run a <i>Test Print</i> .
Cloud Icon shows Red (Offline)	No internet connection or online sync disabled.	Normal behavior—Invify continues 100% offline. Invoices queue in the outbox and sync automatically once internet returns.
LAN Sync not finding other tills	Devices connected to different Wi-Fi networks or router client isolation is ON.	Ensure all devices are on the exact same Wi-Fi SSID/band. Disable "AP Isolation" on the router or use a mobile hotspot.
Forgotten Manager PIN	Security lockout after multiple incorrect attempts.	Use your Super Admin Recovery Passcode or reset the PIN via the <i>Admin Web Cloud Dashboard</i> .
Unmatched Bank Deposit	Customer paid via transfer without specifying reference code.	Open <i>Reconciliation</i> → Locate payment in <i>Unmatched Queue</i> → Tap <i>Assign to Customer / Student</i> .

Printing this Manual for Operations & Staff Training

Open this file in Google Chrome, Microsoft Edge, or Safari. Press **Ctrl + P** (or **Cmd + P** on Mac), choose

Save as PDF

or select your office printer, set paper size to

A4

, and check

Invify School Mode

Comprehensive User Guide, Dashboard Activities & Sub-Menu Operational Manual

Welcome to **Invify School Mode**. This handbook provides end-to-end instructions for school proprietors, bursars, administrators, and academic staff. It covers all **20 Dashboard Tiles**, dedicated **Sub-Menu Activities** (Finance, Defaulters, Virtual Accounts, Lesson Notes), and operational workflows for seamless term management.

❖ Quick-Start Sequence (Beginning of Term)

1. Academic Setup:

Open *Academic Setup* to define the active Academic Year (e.g. 2026/2027) and select the Current Term.

2. Classes & Subjects:

Configure class arms (e.g. JSS 1 Alpha, Primary 4 Gold) and curriculum subjects.

3. Fee Catalog & Structure:

In *Fee Management*, attach tuition, boarding, uniforms, and PTA levies to their respective classes.

4. Enrollment:

Add or verify students in the *Students* directory and ensure they are assigned to current classes.

5. Bill Generation:

Use *Fee Management* → *Batch Billing* or *New Term Bill* to issue bills with automated carry-forward debt.

6. Hardware Pairing:

Check *Printer & MPOS* to ensure Bluetooth/USB receipt printers are linked and ready.

📄 Table of Contents

- 1. Top Navigation & Status Bar
- 2. Dashboard Master Grid Reference
- 3. New Term Bill & Billing Records
- 4. Academic Setup & Subject Registry
- 5. Students & Teachers Management
- 6. Finance Hub & Executive Dashboard
- 7. Virtual Accounts & Automated Reconciliation
- 8. Fee Structuring & Fee Catalog
- 9. Result Entry & Digital Grading
- 10. Lesson Notes & AI Lesson Wizard
- 11. Printer, MPOS & Connectivity
- 12. Admin Hub, Cloud Metrics & Security
- 13. Standard Operating Procedures (SOPs)
- 14. Troubleshooting & FAQ

1. Top Navigation & Status Bar

The top application bar provides continuous status monitoring and rapid access to core device features:

Component	Visual Indicator	Function & Activity Description
School Brand & Crest	Logo + Name	Displays the institution's official name and uploaded crest. Configurable in <i>Settings</i> .
Plan Badge	STANDARD / PRO	Indicates active software tier (Standard, Pro, Enterprise) and license status.
Live Clock	YYYY-MM-DD HH:mm	Ensures all financial ledger postings and receipt timestamps are legally synchronized.
LAN Peer Sync	☒ or ☐	Shows whether the terminal is acting as the Sync Master or connected to other cashier terminals via local WiFi.
Cloud Connection	Cloud Icon (Green / Red)	Shows backend cloud heartbeat. Clicking opens the Sync Configuration Dialog to toggle real-time invoice and ledger upload.
Theme Mode	Sun / Moon Icon	Toggles between Light , Dark , and System Default themes for comfortable indoor/outdoor operation.
Notification Bell	Bell Icon with counter	Pops up real-time payment alerts, automated bank transfer receipts, and synchronization status updates.
Context Menu (:)	3-Dots Menu	Provides direct shortcuts to About Invify , Help & Support , and this User Guide .

2. Dashboard Master Grid Reference

The School Mode home screen presents 20 dedicated tiles organized into logical administrative, academic, and financial modules. You can drag and drop tiles to customize your layout.

Tile Name	Color / Category	Primary Responsibility
NEW TERM BILL	Primary Blue / POS	Issue customized student bills, accept split payments, and print thermal/A4 receipts.
ACADEMIC SETUP	Brown / Academic	Define academic sessions, terms, classes, arms, and grading rule thresholds.
PRINTER & MPOS	Purple / Hardware	Pair Bluetooth/USB thermal printers, test paper cuts, and configure POS card terminals.
STUDENTS	Indigo / Records	Manage student directory, admissions, parent contacts, virtual accounts, and ledgers.
SUBJECTS	Blue / Academic	Curriculum management, subject codes, department categories, and teacher allocations.
BILLING RECORDS	Green / Finance	Full invoice audit registry; search by student or date, reprint receipts, or process refunds.
TEACHERS	Deep Purple / HR	Staff directory, subject-teacher assignments, contact info, and permission roles.
TRANSACTION HISTORY	Indigo / Audit	Immutable chronological audit log of all financial receipts, cash movements, and reversals.
STUDENT ANALYTICS	Blue Accent / BI	Visual reporting on class enrollment, fee collection velocity, and academic grade curves.
CALCULATOR	Teal / Utilities	Built-in financial keypad for fast calculations and change computation without leaving the app.
SETTINGS	Blue Grey / Admin	Configure school profile, address, receipt headers/footers, PIN locks, and currency symbols.
ADMIN HUB	Deep Orange / System	Passcode-gated center for Quaser payment keys, audit trails, and database backup/restore.
CLOUD METRICS	Indigo / System	Real-time synchronization monitor, pending upload queue, and network diagnostics.
FINANCE ANALYTICS	Blue Accent / Finance	Revenue trend analysis, payment channel distribution (Cash, Transfer, POS), and forecasting.
RECONCILIATION	Teal / Finance	Match unallocated bank deposits with student accounts and resolve discrepancies.

Tile Name	Color / Category	Primary Responsibility
FINANCE DASHBOARD	Blue Grey / Finance	Executive summary of total receivables, collected funds, outstanding debts, and defaulter tracking.
FEE MANAGEMENT	Cyan / Billing	Assign fee schedules to classes, set compulsory/optional fees, and run batch bills.
FEES	Orange / Catalog	Catalog of all chargeable school items (Tuition, Uniforms, Books, Shuttle, PTA).
RESULT ENTRY	Red Accent / Academic	Digital score entry for CA1, CA2, Exams, automated grade computation, and report cards.
LESSON NOTES	Teal / Teaching	Curriculum lesson planner, rich text editor, AI lesson wizard, and supervisor approvals.

3. New Term Bill & Billing Records

The school's front-desk billing and collection engine operates with offline-first speed and hardened ledger integrity.

NEW TERM BILL (Student Point of Sale)

Issue immediate invoices and record fee payments for enrolled students.

- **Student Lookup:** Type student name or admission number. The system instantly loads their class and previous debt balance.
- **Item Selection:** Select required fee items (Tuition, Books, Uniform, Bus). Quantities and custom discounts can be applied.
- **Carry-Forward Balance:** Any unpaid balance from previous terms is automatically appended to the current bill summary.
- **Multi-Channel Payment:** Record payments via *Cash, Bank Transfer, POS Card Reader, Cheque, or Split Payment*.
- **Instant Receipting:** Automatically triggers 58mm/80mm thermal receipt printing or generates a detailed A4 PDF receipt.

BILLING RECORDS (Invoice & Receipt Archive)

Complete historical registry of every bill issued by the bursary department.

- **Multi-Filter Search:** Filter invoices by Term, Class, Payment Status (**PAID** , **PARTIAL** , **UNPAID**), or Cashier.
- **Reprint & Share:** Reprint receipts at any time or share digital PDF receipts directly with parents via WhatsApp or Email.
- **Audited Reversals:** Authorize refunds or bill adjustments with compulsory audit remark logging to prevent bursary fraud.

💡 PRO TIP: Idempotent Ledger Protection

Invify uses an immutable, idempotent ledger. Even during network drops or power outages, transactions are recorded locally without risk of double-billing or dropped payments.

4. Academic Setup & Subject Registry

Define the institutional structure, grading criteria, and curriculum before starting academic operations.

Academic Years & Terms

Create academic sessions (e.g. 2026/2027) and define 3 active terms: *First Term*, *Second Term*, and *Third Term*. Activating a term automatically sets the default billing and grading scope.

Classes & Arms

Establish grade levels (Creche, Nursery, Primary, JSS, SSS) and create arms (e.g., Primary 1A, Primary 1B). Assign Class Teachers to each arm for automated result compilation.

Grading Rules

Configure grade score bands (e.g., 75-100 = A1 Distinction, 70-74 = B2, 65-69 = B3, etc.), GPA points, and auto-generated teacher remarks for report cards.

Subject Registry

Register curriculum subjects with standard codes (e.g., MTH101, ENG101). Categorize by department (Sciences, Arts, Commercial) and attach to specific classes.

5. Students & Teachers Management

Centralized 360-degree profiles for students, parents, and academic staff.

STUDENT DIRECTORY & PROFILE HUB

Complete academic and financial lifecycle management for every student.

- **Student Bio & Photo:** Full name, admission number, date of birth, gender, house/club, and passport photograph.
- **Parent / Guardian Connect:** Store emergency phone numbers and email with 1-tap WhatsApp and direct phone call buttons.
- **Financial Ledger Tab:** Real-time statement showing every bill raised, payment made, current balance, and download/print statement button.
- **Academic History Tab:** Consolidated report cards across past terms showing GPA trajectory and subject breakdowns.
- **Promotion & Transfer:** Single or batch promote students to next higher class arm at the end of the academic year.

TEACHER & STAFF DIRECTORY

Manage staff records, assigned classes, and pedagogical workloads.

- **Staff Profiles:** Employment IDs, phone contacts, designations, and qualifications.
- **Teaching Allocations:** Map teachers to specific class arms and subjects for automatic result entry permissions.
- **Role Assignment:** Designate staff roles (e.g., Subject Teacher, Form Master, Bursar, Administrator).

6. Finance Hub & Executive Dashboard

Executive-level financial governance, revenue analytics, and collection oversight. Access is secured by staff PIN authorization.

EXECUTIVE FINANCE DASHBOARD (Gated: Admin / Finance)

High-level command center for the school's financial health.

- **Gross Receivables:** Total expected fee revenue for the active term across all enrolled students.
- **Total Collections:** Real-time aggregated payments received across all bank accounts and cash registers.
- **Outstanding Debt:** Current uncollected balances and defaulter volume.
- **Defaulters Management Sub-Menu:** Filter debtors by class or amount, export debtor lists, and send bulk fee reminders.

FINANCE ANALYTICS & REVENUE TRENDS

Deep-dive business intelligence and trend projections.

- **Channel Distribution:** Compare revenue share across Bank Transfers, POS, Cash, and Online Virtual Accounts.
- **Collection Velocity:** Daily, weekly, and monthly collection curves showing peak payment periods.
- **Term-on-Term Comparative:** Benchmark current term performance against previous terms to identify revenue leakage.

7. Virtual Accounts & Automated Reconciliation

Eliminate manual bank teller confirmation with dedicated student virtual account numbers and intelligent reconciliation.

Dedicated Virtual Accounts

Every student can be assigned a permanent, unique bank account number (e.g. Wema/Moniepoint/Access). When a parent transfers fees to this account, the payment automatically credits the student's ledger instantly.

Reconciliation Hub

Review incoming bank payments against invoices. Any unallocated deposits (e.g. transfers with missing student names) appear in the **Unmatched Queue** for 1-click assignment to the correct student.

Staff Authorization Required for Financial Modules

To protect institutional records, clicking *Finance Dashboard*, *Finance Analytics*, or *Reconciliation* triggers a staff authentication prompt. Only staff with

ADMIN

,

FINANCE

, or

EXECUTIVE

roles can view these sections.

8. Fee Structuring & Fee Catalog

Configure flexible fee policies, compulsory vs optional levies, and itemized school charges.

FEE MANAGEMENT (Class Schedules & Batch Billing)

Define structured fee packages per class arm.

- **Class Fee Rules:** Assign specific fee items to classes (e.g. JSS 1 Tuition = ₦120,000; Laboratory Levy = ₦15,000).
- **Compulsory vs Optional:** Flag essential fees (Tuition) as compulsory, while making services like School Bus, Lunch, or Clubs optional during billing.
- **1-Click Batch Bill Generation:** Generate invoices for all students in an entire class or the whole school simultaneously with previous debts carried forward.
- **Scholarships & Discounts:** Apply fixed or percentage fee waivers to staff children, scholarship recipients, or siblings.

FEES & PRODUCTS CATALOG (Stock / Items)

Inventory and price management for chargeable school items.

- **Item Catalog:** Add Tuition, Uniforms, Exercise Books, Cardigans, Badges, ID Cards, and Excursions.
- **Inventory Tracking:** Track physical stock quantities for uniforms and books with automated reorder alerts.
- **Category Tagging:** Categorize items under Tuition, Academic Supplies, Uniforms, or Sundry Levies.

9. Result Entry & Digital Grading

Fast, error-free academic assessment compilation with automated grade, position, and remark calculation.

Step-by-Step Result Recording Procedure

1. Tap

RESULT ENTRY

on the dashboard.

2. Select the

Academic Year

,

Term

,

Class Arm

, and

Subject

.

3. Enter scores in the spreadsheet-style grid for

CA 1 (e.g. 20)

,

CA 2 (e.g. 20)

, and

Terminal Exam (e.g. 60)

.

4. The system automatically computes the

Total (100)

, assigns the

Grade Letter

(A, B, C, D, F) based on grading rules, and updates class rankings.

5. Tap

Save / Submit

. Class masters can preview and print batch report sheets directly.

10. Lesson Notes & AI Lesson Wizard

Standardize pedagogical preparation with rich lesson planning tools and AI-assisted generation.

LESSON NOTES HUB & AI WIZARD

Empower teachers to draft, organize, and submit structured lesson plans.

- **AI Lesson Generator Wizard:** Enter Subject, Topic, Class Level, and Duration. The AI wizard generates a complete plan including Behavioral Objectives, Instructional Materials, Introduction, Step-by-Step Delivery, Evaluation Questions, and Summary.
- **Rich Text Editor:** Teachers can review, customize, and add curriculum notes using standard text formatting tools.
- **Supervisor Review:** Head teachers can review, approve, or request revisions on submitted notes before class delivery.
- **Print & Archive:** Print lesson plans for physical inspection binders or archive them digitally across terms.

11. Printer, MPOS & Connectivity

Configure peripheral hardware and POS terminals for seamless payment collection and receipting.

Printer Pairing & Setup

Connect thermal printers via Bluetooth, USB, or LAN (Network). Supports 58mm and 80mm ESC/POS printers, built-in Sunmi POS printers, and desktop A4 printers. Use *Test Print* to verify alignment.

MPOS Card Terminal Pairing

Pair Bluetooth card readers for debit card fee payments. The tile shows dual status indicators: **Green dot** for connected printer and **Blue dot** for configured POS terminal.

12. Admin Hub, Cloud Metrics & Security

High-level administration, Quaser payment integrations, database safeguards, and cloud telemetry.

Admin Hub Passcode Protection

The Admin Hub is strictly gated by the master administrative PIN. This area controls institution-wide parameters, payment keys, and database integrity.

ADMIN HUB & SYSTEM CONTROLS

Core governance and payment architecture.

- **System Setup:** Configure organization profile, default currency, receipt footers, and institutional branding.
- **Quaser Payment Keys:** Manage merchant API keys and webhooks for automated payment verification.
- **Database Backup & Restore:** Export full database snapshots to local storage or external drives for disaster recovery.
- **Audit Logs:** Comprehensive record of administrative activities, price adjustments, score edits, and deletions.

CLOUD METRICS & MULTI-DEVICE SYNC

Real-time telemetry and synchronization health monitoring.

- **Outbox Queue:** Displays transactions pending cloud sync when operating in offline/poor internet environments.
- **Peer-to-Peer LAN Sync:** Connect multiple cashier and bursary tablets over local Wi-Fi without needing an active internet connection.

13. Standard Operating Procedures (SOPs)

Recommended step-by-step routines for daily bursary operations and term milestones.

Daily Bursary Collection Flow

1. Power on terminal and verify printer status (Green dot on tile).
2. Open **New Term Bill**, look up student, select paid fee items.
3. Record payment channel (Cash, Transfer, POS) and print customer receipt.
4. At end of day, open **Transaction History** to verify register totals against physical cash in drawer.

End-of-Term Processing Routine

1. Ensure all subject teachers complete **Result Entry**.
2. Generate and inspect draft report sheets.
3. Open **Finance Dashboard → Defaulters** to audit remaining debts.
4. In **Academic Setup**, create the upcoming term and roll forward balances.

14. Troubleshooting & Frequently Asked Questions

Issue Observed	Probable Cause	Recommended Resolution
Printer status dot is Red	Bluetooth disconnected or printer powered off.	Turn on printer, ensure paper roll is loaded, go to <i>Printer & MPOS</i> and tap <i>Connect</i> .
Student has unrecorded debt	Previous term bill was not generated or unpaid.	Open student profile → <i>Ledger Tab</i> to inspect statement or manually adjust balance with an audited bill.
Bank transfer not reflecting on student	Payment sent without reference or virtual account.	Open <i>Reconciliation Hub</i> → Find the transaction in <i>Unmatched Payments</i> and click <i>Assign to Student</i> .
Cannot access Finance / Admin	Insufficient staff role or incorrect PIN.	Verify staff credentials. Admin/Finance privileges must be configured in <i>Teachers & Staff</i> settings.

Printing this Manual for Staff Distribution

Open this file in Google Chrome, Microsoft Edge, or any modern browser. Press **Ctrl + P** (or **Cmd + P** on Mac), select

Invify School Management Suite · Empowering Educational Excellence with Reliable Financial Technology

© 2026 Invify. All Rights Reserved. · Version 1.0.0 (Standard & Pro)

Welcome to **Invify Retail Mode**. Engineered for supermarkets, boutiques, electronics shops, pharmacies, wholesalers, and general merchandise retail stores. This manual covers all **13 Dashboard Tiles**, dedicated **Sub-Menu Activities** (Stock Management, Valuation Reports, Customer Debt Ledgers, Financial Analytics), and high-speed point-of-sale workflows.

❖ Quick-Start Sequence (Store Setup)

1. Store Profile:

In *Settings*, set your Business Name, Store Address, Phone Numbers, Currency Symbol (₦, \$, £, €), and upload your Logo.

2. Categories:

Open *Stock* → *Manage Categories* to organize items (e.g. Groceries, Drinks, Toiletries, Electronics).

3. Product Catalog:

Add products with *Cost Price*, *Selling Price*, *Initial Stock Quantity*, and *Barcodes*.

4. Hardware Pairing:

Go to *Printer & MPOS* to link your 58mm/80mm Bluetooth/USB receipt printer and card reader.

5. Customers:

Add frequent shoppers or wholesale clients in *Customer Lookup* to track credit sales and loyalty.

6. First Sale:

Open *New Invoice*, scan or select products, take payment, and issue a thermal receipt.

📄 Table of Contents

- 1. Top Navigation & Status Bar
- 2. Dashboard Master Grid Reference
- 3. New Invoice & Point of Sale (POS)
- 4. Stock Management & Category Sub-Menu
- 5. Inventory Valuation & Stock Reports
- 6. Customer Lookup & Debt Ledgers
- 7. Sales Records & Transaction History
- 8. Printer, MPOS & Peripheral Setup
- 9. Finance Analytics & Bank Reconciliation
- 10. Admin Hub, Cloud Metrics & Security
- 11. Standard Operating Procedures (SOPs)
- 12. Troubleshooting & FAQ

1. Top Navigation & Status Bar

The top application bar provides live diagnostic health and quick-access utility controls:

Element	Visual Indicator	Function & Activity Description
Business Brand	Logo + Store Name	Displays store branding on both the screen and printed receipt headers.
Plan Badge		Displays your software edition and active license verification status.
Live Clock	YYYY-MM-DD HH:mm	Guarantees exact timestamping for sales invoices, cashier shifts, and transaction audits.
LAN Sync Status		Indicates local network peer sync status across multiple cashier tills.
Cloud Connection	Cloud Icon (Green / Red)	Shows server connection status. Tap to open the Sync Configuration Dialog to toggle online sync.
Theme Mode	Sun / Moon Icon	Switch instantly between Light , Dark , and System modes.
Notification Bell	Bell with badge counter	Alerts you to incoming bank transfers, stock replenishment warnings, and system events.
Context Menu (:)	3-Dots Menu	Direct navigation to About Invify , Help & Support , and this User Guide .

2. Dashboard Master Grid Reference

The Retail Mode home screen features 13 primary operational tiles organized for cashier speed and managerial oversight:

Tile Name	Color / Category	Primary Responsibility
NEW INVOICE	Primary Indigo / POS	Fast checkout counter, barcode scanning, cart management, split payments, and receipt generation.
INVENTORY REPORT	Indigo / Reports	Total stock valuation at cost and selling prices, expected profit margins, and low stock lists.
CUSTOMER LOOKUP	Blue Accent / CRM	Customer directory, purchase history, outstanding debt balances, and WhatsApp statements.
PRINTER & MPOS	Purple / Hardware	Bluetooth/USB thermal receipt pairing, test prints, paper cut control, and MPOS card terminal configuration.
STOCK	Orange / Inventory	Product catalog, restock entries, category management, barcode mapping, and cost/selling prices.
SALES RECORDS	Green / Sales	Full invoice archive; search by customer or receipt number, reprint receipts, and process refunds.
TRANSACTION HISTORY	Indigo / Audit	Immutable audit trail of all payments, cash receipts, transfers, and end-of-day register totals.
CALCULATOR	Teal / Utilities	On-screen calculator for quick quotes, discounts, and customer change calculation.
SETTINGS	Blue Grey / Admin	Store profile, receipt footer terms, tax/VAT settings, PIN locks, and offline database backups.
ADMIN HUB	Deep Orange / System	Passcode-gated center for Quaser payment keys, audit trails, and master system preferences.
CLOUD METRICS	Indigo / System	Real-time cloud sync telemetry, offline outbox monitoring, and database health.
FINANCE ANALYTICS	Blue Accent / Finance	Revenue curves, gross profit analysis, top-selling products, and cashier performance breakdown.
RECONCILIATION	Teal / Finance	Match bank transfers and card settlements with sales records; resolve unallocated payments.

3. New Invoice & Point of Sale (POS)

The core billing engine designed for high-volume counter sales with offline-first reliability.

NEW INVOICE (Checkout Counter)

Rapid item scanning, cart adjustments, and flexible multi-channel payment collection.

- **Barcode Scanning & Quick Search:** Use USB/Bluetooth laser scanners, device camera, or text search to add items in milliseconds.
- **Cart Adjustments:** Adjust quantities, apply item-level or invoice-level discounts, and toggle tax/VAT.
- **Customer Assignment:** Attach sales to registered customers to track purchases or record credit/debt sales.
- **Multi-Channel Payment:** Accept *Cash, POS Card, Bank Transfer, Store Credit, or Split Payment* (e.g. 50% Cash + 50% Transfer).
- **Instant Receipt Printing:** Auto-triggers 58mm/80mm thermal slips or generates digital A4 PDF receipts.

⚡ 4-Step Cashier Checkout Procedure

1. Tap

NEW INVOICE

from the dashboard or press shortcut key.

2. Scan products or search and tap items to add to the cart.

3. Tap

Charge / Pay

, select the payment method, and enter amount tendered.

4. Collect payment, hand customer the printed receipt and change. The stock is automatically deducted in real time.

4. Stock Management & Category Sub-Menu

Complete inventory lifecycle management with cost tracking, profit margin calculation, and category hierarchies.

Product Registration & Editing

Enter Product Name, Barcode/SKU, Category, Cost Price, and Selling Price. The system automatically computes your gross profit margin percentage per unit.

Manage Categories Sub-Menu

Access *Stock* → *Manage Categories* to organize merchandise into logical departments (e.g. Beverages, Provisions, Toiletries, Electronics, Fashion).

Stock In / Restocking

Record new supplier deliveries. Add incoming quantities to existing stock with updated cost prices to maintain accurate inventory valuation.

Low Stock & Reorder Alerts

Set reorder threshold levels per item. Products running low are highlighted in orange/red to prevent stockouts.

PRO TIP: Accurate Cost Prices = Accurate Profits

Always record the *Cost Price (Purchase Price)* for every item. This enables the system to calculate your exact net margins and daily store profitability in **Finance Analytics**.

5. Inventory Valuation & Stock Reports

Real-time financial visibility into total merchandise investment and projected revenues.

INVENTORY REPORT & VALUATION

Executive inventory auditing and financial metrics.

- **Total Stock Cost:** Total capital currently tied up in physical inventory at purchase cost.
- **Total Retail Value:** Gross expected revenue when all current merchandise is sold at retail prices.
- **Projected Gross Profit:** Projected total profit margin across all warehouse and store stock.
- **Stock Status Breakdown:** Instant counts of *In Stock*, *Low Stock*, and *Out of Stock* lines.
- **Export & Print:** Export inventory audits to CSV/Excel or print summary valuation sheets.

6. Customer Lookup & Debt Ledgers

Customer relationship management, credit sales tracking, and direct communication.

CUSTOMER LOOKUP & CRM DIRECTORY

Manage buyer profiles, credit limits, and debt collection.

- **Customer Search:** Instant search by customer name, phone number, or company.
- **Purchase Ledger:** Detailed chronological history of all invoices and items purchased by the customer.
- **Outstanding Balance Tracking:** Instantly view debts from credit sales and record partial or full debt repayments.
- **Direct Communication:** 1-click **WhatsApp Statement** and direct phone calling to follow up on pending payments.

7. Sales Records & Transaction History

Complete audit trails for all sales, register receipts, payment methods, and cash balancing.

Sales Records (Invoices)

Search and filter all past sales by Date, Customer, Payment Status (**PAID** , **PARTIAL** , **UNPAID**), or Cashier. Reprint customer receipts or send PDF invoices.

Transaction History (Audit Trail)

Immutable chronological log of every monetary event. Displays payment channels (Cash, POS, Transfer), cashier shift totals, and cash-in-drawer reconciliation.

Refund & Reversal Governance

Sales refunds or item returns require manager authorization and a documented reason. All reversals are permanently logged in the audit trail to eliminate cashier shrinkage.

8. Printer, MPOS & Peripheral Setup

Configure thermal receipt printers, barcode scanners, and wireless payment card readers.

PRINTER & MPOS CONFIGURATION

Hardware connectivity management and slip customization.

- **Connection Interfaces:** Supports Bluetooth, USB, Network LAN (ESC/POS), and integrated Sunmi POS thermal printers.
- **Dual Status Indicator Dots:**
 - **Green Dot:** Receipt printer connected and ready.
 - **Red Dot:** Printer disconnected or offline.
 - **Blue Dot:** MPOS card terminal paired.
 - **Grey Dot:** MPOS terminal not configured.
- **Receipt Customization:** Configure store header text, address, phone numbers, return policy footer, and receipt logo.
- **1-Click Test Print:** Verify paper feed, print darkness, and auto-cutter functionality.

9. Finance Analytics & Bank Reconciliation

Executive financial business intelligence and automated bank settlement matching. Access is secured by staff PIN authorization.

FINANCE ANALYTICS (Gated: Admin / Finance)

Visual business intelligence and store growth analytics.

- **Revenue & Net Profit:** Real-time charts showing total turnover vs gross profit after inventory cost deductions.
- **Payment Method Breakdown:** Distribution of revenue across Cash, Bank Transfer, POS Card, and Credit.
- **Top Selling Products:** Identify top-performing product lines by volume and revenue contribution.
- **Cashier Sales Performance:** Compare sales volume and register accuracy across different staff operators.

RECONCILIATION (Bank & Payment Settlement)

Verify that money received in your bank matches sales recorded on the till.

- **Transfer Verification:** Match incoming bank transfer alerts against issued receipts.
- **Unmatched Queue:** Resolve customer payments where bank reference numbers or payer names were unclear.
- **Discrepancy Audit:** Identify underpayments, overpayments, or duplicate transactions before closing shifts.

Staff Authorization Required for Financial Sections

Accessing *Finance Analytics* or *Reconciliation* triggers a secure staff authentication prompt. Only accounts with

ADMIN

,

FINANCE

, or

EXECUTIVE

privileges can view financial reports.

10. Admin Hub, Cloud Metrics & Security

Master administrative settings, Quaser payment integrations, and cloud sync telemetry.

Admin Hub (Passcode Protected)

Manage merchant Quaser API keys, webhook URLs for automated bank transfer confirmation, system reset options, and offline database backup/restore files.

Cloud Metrics & Multi-Till Sync

Monitor real-time websocket server health, review offline pending invoice queues, and manage peer-to-peer LAN synchronization across multiple store checkouts.

11. Standard Operating Procedures (SOPs)

Standard routines for cashiers and store managers to ensure 100% financial and inventory accuracy.

Morning Shift Opening Checklist

1. Power on terminal and verify Bluetooth printer status (**Green dot**).
2. Count opening cash float in the register.
3. Ensure barcode scanner is plugged in and responding.
4. Verify that the Live Clock and Sync Status icons are active.

Evening Shift Close & Balancing Flow

1. Open **Transaction History** to view the daily sales summary.
2. Count physical cash in the drawer and match against the Cash Total.
3. Verify POS card terminal settlement slips against the POS Total.
4. Open **Reconciliation** to confirm all bank transfers.
5. Perform an offline database backup in **Settings**.

12. Troubleshooting & Frequently Asked Questions

Issue Observed	Probable Cause	Recommended Action
Printer dot is Red / Not printing	Bluetooth disconnected, out of paper, or cover open.	Check paper roll, power cycle printer, open <i>Printer & MPOS</i> , and tap <i>Connect</i> . Run a <i>Test Print</i> .
Barcode scanner not finding item	Barcode not registered or scanned with extra prefix.	Open <i>Stock</i> , edit the product, tap the barcode field, and rescan the product barcode to map it correctly.
Negative or wrong stock count	Items sold before entering supplier restock invoice.	Open <i>Stock</i> , search the item, and tap <i>Restock / Stock In</i> to update quantity to actual physical count.
Cloud icon shows Red (Offline)	Internet connection down or online sync disabled.	Sales continue uninterrupted offline. When internet is restored, the system automatically syncs pending invoices to the cloud.
Access Denied to Finance Analytics	Staff account lacks Manager/Admin privileges.	Authenticate using an Admin or Finance staff PIN to unlock financial dashboards.

Printing this Manual for Staff Training

Open this file in Google Chrome, Microsoft Edge, or any modern web browser. Press **Ctrl + P** (or **Cmd + P** on Mac), select

Save as PDF

or your office printer, set paper size to

A4

, and check

Background graphics

for a print-ready training booklet.

Service Mode · Field Manual

Invify Service Mode

Short User Manual · Home Menu & Services Dashboard

This booklet is for teams running **Service Mode** — workshops, repairs, sewing, consultancy, and other job-based businesses. It walks through the home screen tiles and every activity inside the **Services Dashboard** sub-menu.

🔧 First-time setup checklist

1. Organization:

Confirm business name, logo, address, and currency in Settings.

2. Printer & mPOS:

Pair your Bluetooth printer and card reader (if used).

3. Services Setup:

From Services Dashboard → Setup, add job titles, materials, labor rates, and expense categories.

4. Customers:

Add clients as you create jobs, or browse them later under Customers.

5. First job:

Create a New Job, take payment, update status, then print or share the receipt.

Contents

1. Home screen overview
2. Services Dashboard (sub-menu)
3. New Job
4. All Jobs & job details
5. Customers
6. Services Setup
7. Services Analytics
8. Shared tools (printer, records, finance)
9. Job status lifecycle
10. Quick tips

1. Home Screen Overview

After login you land on the main tile grid. In Service Mode the tiles are arranged for job work first, then shared business tools.

Tile	What it does
SERVICES DASHBOARD	Pipeline overview: revenue collected, active/ready counts, recent jobs, and shortcuts to Customers, Analytics, and Setup.
NEW JOB	Create a work order / job invoice for a customer (saved offline-first).
ALL JOBS	Searchable list of every job with status filters (Pending → Delivered).
CUSTOMERS	Customer directory; open a profile to see their job and payment history.
PRINTER & MPOS	Connect Bluetooth printer and mPOS card reader. Status dots show device health.
SERVICE RECORDS	Historical service / sales style records for completed work and reprints.
PAYMENT HISTORY	Audit trail of payments collected across jobs and channels.
CALCULATOR	Quick on-device calculator for quotes and change.
SETTINGS	Business profile, labels, warranty toggle, currency, sync, and mode options (PIN-protected where configured).
ADMIN HUB	Admin tools and elevated controls (access may require verification).
CLOUD METRICS	Cloud sync / usage metrics (Pro / Cloud tiers).
FINANCE ANALYTICS	Broader finance views for management (secured).
RECONCILIATION	Executive reconciliation of collections and settlements (secured).

Top bar at a glance

Business name and plan badge (e.g. STANDARD) appear on the left. Date/time sits in the center. Cloud and sync icons on the right show online/offline health; the bell opens notifications; the : menu opens extra actions.

2. Services Dashboard (Sub-Menu)

Tap **SERVICES DASHBOARD** to open *Services Overview* — the daily control room for your job pipeline. Pull down to refresh.

2.1 Profitability summary

The blue banner at the top shows **amount collected / total job value**. Tap it to jump straight into **Services Analytics**.

2.2 Snapshot cards

Revenue

Sum of all job totals currently loaded.

Received

Total payments already recorded against those jobs.

Active

Jobs marked IN_PROGRESS.

Ready

Jobs marked READY for pickup/delivery.

2.3 Quick action buttons

Customers

Opens the customer directory from inside the dashboard (same as the home CUSTOMERS tile).

Analytics

Revenue trends, expense breakdown, and date-range reporting for the service business.

Setup

Configure job title presets, material categories, parts/prices, labor rates, and expense categories.

2.4 Recent jobs

Shows the latest jobs (up to five). Each row shows title, job ID, remaining balance, and status. Tap a row to open **Job Details**. Use **View All** to open the full All Jobs list.

Floating “New Job” button

From Services Overview you can also tap the green

New Job

FAB to create a job without returning to the home grid.

3. New Job

Use **NEW JOB** (home tile or dashboard FAB) to open a work order. Jobs save **offline first** ("Save Job Offline") and sync when the cloud is available.

Create a job — step by step

1. **Customer:**

Select an existing client or register a new one (name + phone).

2. **Project photo (optional):**

Take a photo or pick from gallery for "before / expected" reference.

3. **Job type / title:**

Type freely or pick from presets (e.g. Oil Change, Traditional Dress Sewing).

4. **Description:**

Notes, measurements, fabric/parts info.

5. **Pricing:**

- *Simple*: enter one Total Cost.
- *Detailed Billing*: toggle on to split

Workmanship / Labor

and

Materials / Parts

.

6. **Due date:**

Optional completion / pickup date.

7. **Warranty:**

If enabled in Settings, choose duration (1 Month ... 3 Years).

8. Tap

Save Job Offline

.

Workmanship vs materials

Detailed billing keeps professional fees separate from parts. Labor presets and material prices come from **Services Setup**

— configure them once so staff can quote faster.

4. All Jobs & Job Details

4.1 All Jobs list

Search by customer name or job ID. Filter chips: **All** • **Pending** • **In Progress** • **Ready** • **Delivered**. Refresh from the app bar if you need a fresh load from storage.

4.2 Job Details actions

Opening a job shows title, status, description, due date, warranty, photo, remaining balance, total cost, and amount paid.

Add Payment

Record a payment against the remaining balance (e.g. cash). The balance and “Received” totals update after confirm.

Status

Move the job through Pending → In Progress → Ready → Delivered.

Print Receipt

Send the job receipt to the paired Bluetooth printer.

Preview / Share PDF

Generate a professional PDF job invoice to preview, share via WhatsApp/email, or archive.

The **Job Log / Bill Breakdown** section lists workmanship, materials (qty × price), creation events, and payment notes for an audit trail on the job itself.

5. Customers

The directory lists every registered service customer (name and phone). Tap a customer to open their history ledger — past jobs, balances, and related activity. Customers are usually created during **New Job**; you can also add them from the customer picker when creating a job.

Client value tip

Use a customer’s history to see outstanding balances before starting another job, and to identify your highest-value clients.

6. Services Setup (Dashboard Sub-Menu)

From Services Dashboard → **Setup**, configure the catalogs staff use every day.

Job Titles & Presets

Common job names (Oil Change, Sewing, AC Service, etc.) for fast autocomplete on New Job.

Material Categories

Group parts (Automotive, Building, Fabric, Electronics, etc.).

Materials & Parts

Define stockable items with default prices for detailed billing.

Labor Settings

Default workmanship / labor fee presets staff can pick while quoting.

Expense Categories

Cost buckets for service expenses (Fuel, Consumables, Subcontract, etc.) used in analytics logging.

7. Services Analytics

Open from the dashboard quick action or the profitability banner. Default range is the last 30 days; use the date-range icon to change it.

- **Summary cards:** Revenue and related performance totals for the selected period.
- **Revenue trend:** Chart of collections over time.
- **Expense breakdown:** Costs by category.
- **Log Service Expense:** Use the chart (+) action to record a service cost against a category.

8. Shared Tools on the Home Grid

8.1 Printer & mPOS

Pair and test your Bluetooth receipt printer and mPOS card reader. The home tile shows small status indicators (e.g. grey / red) so you can see at a glance if a device is offline before taking payment.

8.2 Service Records

Historical record of services rendered — useful for reprints, reviews, and end-of-day checks.

8.3 Payment History

Cross-job payment audit: when money was taken, how much, and against which activity. Use this when reconciling the cash drawer or mPOS settlement.

8.4 Calculator, Settings, Admin Hub

Calculator

Simple math for quotes and change without leaving the app.

Settings

Branding, currency, warranty, labels, sync, and business mode. Some actions need a PIN.

Admin Hub

Elevated administration (users, backups, advanced controls as licensed).

Cloud / Finance / Reconciliation

Pro/Cloud tools for metrics, management finance, and bank/settlement reconciliation.

9. Job Status Lifecycle

Status	Meaning	Typical next step
PENDING	Job booked / quote accepted; work not started.	Assign technician; move to In Progress when work begins.
IN_PROGRESS	Actively being worked.	Update materials/payments as needed; mark Ready when done.
READY	Finished and waiting for customer pickup or delivery.	Collect remaining balance; print/share receipt; mark Delivered.
DELIVERED	Job closed and handed over.	Keep PDF/receipt for records; review analytics.

10. Quick Tips

Offline-first

Jobs and payments save locally. Watch the top-bar cloud icon; when it shows healthy, data will sync.

Pull to refresh

On Services Overview, pull down after taking payments or changing statuses on another device.

Printer first

If Print Receipt fails, open Printer & mPOS and confirm the printer is paired before retrying from Job Details.

Ready = notify customer

When status is Ready, share the PDF or call the customer; collect balance before marking Delivered.

Daily shop routine (suggested)

1. Check Printer & mPOS status dots on the home tile.
2. Open Services Dashboard — note Active and Ready counts.
3. Create New Jobs as customers arrive; take deposits via Add Payment.
4. Move finished work to Ready; print or share PDFs.
5. End of day: Payment History + Services Analytics; log any expenses.
