

Welcome to the **Invify Enterprise Master User Manual & Operations Guide**. Invify is an offline-first enterprise Point-of-Sale (POS) and business operating system engineered for high availability across retail supermarkets, educational institutions, and repair service workshops.

Master Table of Contents

- PART 1: Platform Foundation & Architecture
- PART 3: Complete School Mode Operations

- PART 2: Complete Retail Mode Operations
- PART 4: Complete Service Mode Operations

PART 1: Platform Foundation, Architecture & Core Settings

Universal System Architecture, Onboarding Wizard, All Payment Gateways, Hardware, and Peer-to-Peer Sync

1. System Architecture & Offline-First Engine

Invify utilizes a dual-engine architecture: an autonomous local embedded database for instant offline cashier billing, coupled with an asynchronous background replication worker that synchronizes with the Invify Cloud and local LAN peer devices whenever network connectivity is available.

2. Initial Setup & Device Onboarding Wizard

Step-by-Step Device Setup Sequence:

- Step 0: Welcome & Profile Linking:** Register a new business or tap "*LINK DEVICE TO EXISTING PROFILE*" to scan the pairing QR code from your Web Admin Dashboard (under *Fleet > Pair Device*). Scanning instantly binds the terminal to your business account.
- Step 1: Identity & Mode Setup:** Enter First Name, Last Name, Email Address, Web Password (minimum 9 characters with uppercase, lowercase, number, symbol), Business Name, Phone Number, and optional Agent Code.

Live Email Availability Guard:

The email input performs a real-time availability check when unfocused or on clicking "*NEXT STEP*". Duplicate emails are strictly blocked, presenting a dialog with direct shortcuts to link the existing profile.

- Step 2: Address & Hardware Telemetry:** Enter Street Address, Country, State, and LGA. The system automatically records GPS coordinates and hardware device identifiers to secure peer-to-peer sync.
- Step 3: Plan Selection & OTP Verification:** Select either a **Free 3-Day Trial** or enter an official **16-Digit Activation Code**. Invify transmits a 6-digit OTP code to your registered Email or WhatsApp to finalize activation.

3. All Payment Methods & Gateway Integrations

PAYMENT CHANNEL	HARDWARE / GATEWAY	OPERATIONAL DESCRIPTION & VERIFICATION
Cash Tender	Physical Cash Drawer	Input amount tendered; system computes change, logs cash-on-hand into Internal Ledger, and prints receipt.

PAYMENT CHANNEL	HARDWARE / GATEWAY	OPERATIONAL DESCRIPTION & VERIFICATION
Card (POS / MPOS)	Bluetooth/USB MPOS Terminal	Exact bill amount transmits to MPOS; customer enters chip card & PIN; auth code prints on receipt.
Dynamic Virtual Accounts	Quasar Banking Gateway	Generates instant 10-digit account (Wema/Providus/Titan). Customer transfers via bank app/USSD. Webhook automatically settles invoice as PAID within seconds.
Direct Bank Transfer	Manual Bank Transfer	Bursar/cashier records sender bank, account name, and transaction reference code for manual reconciliation.
Split & Partial Payments	Internal Ledger	Accept deposits (e.g. 50% upfront for service jobs or school fees) with balance tracking and updated invoices.

4. Hardware Peripherals & Peer LAN Sync

Invify interfaces natively with 58mm and 80mm ESC/POS Bluetooth and USB thermal printers, handheld USB/Bluetooth barcode scanners, electronic cash drawers, and MPOS readers. Multiple counter terminals discover each other over local Wi-Fi to synchronize invoices and inventory without internet connectivity.

PART 2: Complete Retail Mode Operations Guide

Supermarket POS, Stock Management, Valuation Reports, Customer Debt Ledgers, and Cloud Metrics

Retail Home Dashboard & 14-Tile Reference

Figure 1: Invify Retail Main Dashboard — 14 operational tiles covering Point-of-Sale billing, inventory control, hardware pairing, reconciliation, and business analytics.

The Retail Dashboard organizes store management into 14 touch-optimized activity tiles: **New Invoice**, **Customer Lookup**, **Inventory Report**, **Printer & MPOS**, **NIBSS Cert**, **Stock**, **Sales Records**, **Transaction History**, **Calculator**, **Settings**, **Admin Hub**, **Cloud Metrics**, **Finance Analytics**, and **Reconciliation**.

Invoice History, Sales Summary & Filters

Figure 2: Invoice History & Sales Summary — Multi-criteria search, cashier till filters, sales breakdown cards, revenue curve, and expandable audit records.

Filter transactions by cashier, payment channel, amount, or tap *Pending Transfers* to instantly isolate unverified bank transfers. Review period metrics including Total Invoiced, Total Collected, Card POS, Bank Transfer, Virtual Account, and Cash.

Internal Ledger Analytics

Figure 3: Internal Ledger Analytics — Real-time double-entry balances: Total Wallet, Cash on Hand, Pending Quasar clearances, and weekly revenue trend bar chart.

Cloud Metrics & Offline Queue

Figure 4: Cloud Metrics Dashboard — Health score percentage, peripheral connection status, and offline queue counters (Sales, Invoices, and Inventory adjustments pending).

PART 3: Complete School Mode Operations Guide

System Setup, Term Bill POS, Fee Structuring, Parent Management, Student 360 Hub, Invoice History, Finance Treasury, Analytics, Digital Grading & AI Lesson Notes

School Mode 19-Tile Master Dashboard

Figure 5: Invify School Mode Dashboard — 19 comprehensive tiles for bursary billing, academic management, student rosters, parent directory, grading, lesson notes, and analytics.

System Setup & Institutional Branding

Figure 6: System Setup — Official school branding, crest image upload, CAC registration number, and receipt toggles.

Fee Structuring, Catalog & Operational Tools

Figure 7: Fee Structure & Catalog — Operational toolbar (Fee Type, Inventory, Profit, Expense, Setup), category chips, and fixed fee items.

New Term Bill POS Terminal

Figure 8: New Term Bill POS Screen — Dual-pane register displaying searchable fee items, category filters, student cart, and academic session.

Invoice Preview & Checkout Modal

Figure 9: Invoice Preview Modal — Branded institution header, fee subtotal, tax calculation, and 6 payment channels (Cash, POS, Transfer, Virtual Account, Wallet, Pay Later).

Parent Management & Family Billing Hub

Accessible via the **PARENTS** tile on the dashboard (/parent_list), the Parent Management module streamlines multi-sibling fee collection, unified debt tracking, and family financial administration:

- **Family Directory & Class Filtering:** Instant search by parent name or phone number, with dropdown filtering by child class tier. Displays the family's total enrolled children, classes, contact phone, Virtual Account (VA) badge, and aggregated outstanding balance across all siblings.
- **Parent Profile 360° Console:** Consolidated guardian overview displaying Total Outstanding (sum of all children's fee debts) alongside the family's **Parent Credit** balance. Provides direct triggers to *Fund / Pay Outstanding*, *Map Parent Credit to Children*, print thermal account statements, and export signed A5 PDF statements.
- **Canonical Family Virtual Accounts:** Generates a single 10-digit NUBAN virtual account (Wema / Providus / Titan via Quasar Gateway) covering all children in the household. Any inbound bank transfer is automatically routed and allocated across siblings per the school's configured share policy. Legacy child virtual accounts remain active as aliases to prevent failed transfers.
- **5 Automated Payment Allocation (Share) Modes:**

- **Auto Share (Proportional):** Splits incoming funds proportionally across every child with outstanding fees based on their debt balance, using bankers-safe integer kobo math.
- **Lowest to Highest:** Waterfalls payments to fully clear the student with the smallest balance first, maximizing the count of debt-free students.
- **Highest to Lowest:** Waterfalls payments to clear the largest child debt first, reducing major institutional exposures.
- **First Matching Amount:** If a child owes the exact sum transferred, applies 100% to that child; otherwise holds the funds in Parent Credit for staff mapping.
- **Management Decides:** Directs 100% of the payment into Parent Credit without auto-applying, allowing bursary staff to manually assign the credit as instructed.

*Configurable under **Academic Setup > Payments Tab** or **Settings > School Parent Payments**.*

- **Parent Credit Wallet & Mapping Tool:** Any overpayment beyond family debt (or payments under Management Decides) is stored in the family's Parent Credit wallet. Bursars can tap **Map parent credit to children** at any time to allocate credit to pending child balances with real-time validation and debt capping.
- **Transparent Family Audit Ledger:** Chronological payment cards with expandable per-child allocation breakdowns (*Before* → *Allocated* → *After* balances), paired with duplicate thermal and PDF receipt generation.

Student Profile 360° Hub & Dedicated Virtual Accounts

Figure 10: Student Profile Screen — 4 tabs (General, Billing Records, Results, Payments), dedicated Virtual Account generator, and direct PAY trigger.

Invoice History, Period Summary & Auditing

Figure 11: Invoice History Console — Search, class/staff filters, Sales Summary across channels, Revenue Trend curve, and Pending Transfers button.

Finance Dashboard, Treasury & Withdrawals

Figure 12: Finance Dashboard — Annual revenue counters, debtor totals, student payment compliance, and treasury performance curve.

Student Analytics & Revenue Trends

Figure 13: Student Analytics Dashboard — Student census counters, payment ratio donut chart, enrollment by class, and revenue collection cycle curve.
