

Welcome to the **Invify Retail Mode Operational Manual**. Specially engineered for supermarkets, grocery stores, pharmacies, electronics shops, boutiques, and high-volume wholesale warehouses. This field guide provides full operational workflows for **Device Onboarding**, **All Payment Methods** (Card, Virtual Accounts, Cash, and Transfers), **Navigation across all 14 Tiles**, **Internal Ledger Analytics**, and **Cloud Metrics**.

Table of Contents	
• 1. Initial Setup & Device Onboarding	• 2. Top Navigation & Health Bar
• 3. Main Dashboard 14-Tile Reference	• 4. All Payment Methods & Virtual Accounts
• 5. New Invoice & Point of Sale (POS)	• 6. Stock Management & Categories
• 7. Inventory Valuation & Stock Reports	• 8. Customer Lookup & Debt Ledgers
• 9. Invoice History & Audit Logs	• 10. Internal Ledger Analytics
• 11. Cloud Metrics & Offline Queue	• 12. Hardware: Printers & MPOS
• 13. Standard Operating Procedures (SOP)	• 14. Troubleshooting & FAQ

1. Initial Setup & Device Onboarding

Invify features an enterprise onboarding wizard designed to verify organizational identity, prevent duplicate accounts, bind device telemetry, and ensure rapid POS deployment.

Step-by-Step Onboarding Sequence:

- Step 0: Welcome & Existing Profile Linking:** Choose between registering a new business or tapping "*LINK DEVICE TO EXISTING PROFILE*". Tapping the link button opens the camera to scan the QR code from your Web Admin Dashboard (under *Fleet > Pair Device*), immediately syncing all store data without re-entering credentials.
- Step 1: Identity & Mode Setup:** Enter First Name, Last Name, Email Address, Web Password (minimum 9 characters including uppercase, lowercase, number, and symbol), Business Name, Phone Number, and optional Agent Code.

Live Email Availability Guard:
The email field validates in real-time. When leaving the email field or tapping "*NEXT STEP*", the app queries the verification engine. If the email is already registered, navigation is blocked, and an alert provides direct shortcuts to link the existing account or enter a different email.
- Step 2: Address & Device Telemetry:** Enter your Street Address, Country, State, and LGA. The system automatically captures GPS coordinates and hardware device identifiers to secure offline peer sync.
- Step 3: Plan Selection & OTP Verification:** Select either a **Free 3-Day Trial** or enter an official **16-Digit Activation Code**. Invify transmits a 6-digit OTP code to your registered Email or WhatsApp. Enter the code to activate your license.

2. Top Navigation & Health Bar

The top bar provides persistent visibility into network health, store branding, and till status across all screens:

COMPONENT	INDICATOR	FUNCTION & CASHIER ACTION
Store Branding	Logo + Name	Displays active trading business name. Tap to view quick branch info.
Plan Badge	STANDARD / PRO	Indicates active software tier. Tap to view remaining days or upgrade.
Device Clock	YYYY-MM-DD HH:mm	Synchronized audit timestamp used for sales receipts and cashier shifts.
Sync Status	✓ SYNCED / ⚡ SYNCING	Peer-to-peer LAN synchronization status with other counter tills.
Cloud State	Cloud Icon (Green / Red)	Indicates live upstream link to Invify Cloud and automated backups.
Staff Lock	Shield Icon	Instant one-tap lock screen. Requires cashier/supervisor PIN to resume.

3. Main Dashboard 14-Tile Reference

The Retail Dashboard organizes retail operations into 14 high-contrast, touch-optimized activity tiles:

Figure 1: Invify Retail Main Dashboard — 14 operational tiles providing direct access to billing, inventory, hardware, reconciliation, and analytics.

TILE NAME	SHORTCUT / ICON	PRIMARY FUNCTION & USER ACTION
New Invoice	 Cart Icon	Opens POS billing register for scanning, item lookup, and checkout.
Customer Lookup	 User Search	Directory of retail shoppers, wholesale buyers, credit ledgers, and debt.
Inventory Report	 Bar Chart	Live inventory valuation, total items in stock, and potential sales value.
Printer & MPOS	 Printer Icon	Bluetooth/USB thermal receipt pairing, paper feed test, and MPOS reader setup.
NIBSS Cert	 Shield Check	POS terminal host keys, terminal ID (TID), and card routing certification.
Stock	 Box Icon	Add new products, adjust inventory counts, scan barcodes, and manage categories.

TILE NAME	SHORTCUT / ICON	PRIMARY FUNCTION & USER ACTION
Sales Records	 Analytics Bar	Chronological sales transactions, receipt re-printing, and shift returns.
Transaction History	 Receipt Icon	Deep audit ledger with filter by payment method, cashier, and status.
Calculator	 Number Pad	Quick financial desktop calculator without leaving the POS interface.
Settings	 Gear Icon	Store profile, logo, tax rules, business mode switcher, and staff PINs.
Admin Hub	 Admin Badge	Supervisor approvals, discount overrides, cashier permissions, and day-end close.
Cloud Metrics	 Cloud Icon	Offline queue monitoring, sync heartbeat, and terminal health telemetry.
Finance Analytics	 Line Trend	Internal Ledger overview, wallet balances, cash-on-hand, and revenue trends.
Reconciliation	 Bank Columns	End-of-day cash counting, card settlement cross-referencing, and bank matching.

4. All Payment Methods & Virtual Accounts

Invify provides full multi-tender checkout support to handle all Nigerian retail payment preferences:

1. CASH TENDER

Cashier enters amount tendered. The system calculates change, pops the connected cash drawer, logs cash-on-hand into the Internal Ledger, and prints a receipt.

2. CARD (POS / MPOS)

Select Card payment. Invify transmits the exact amount to the paired Bluetooth/USB MPOS terminal. Customer inserts chip card and inputs their 4-digit PIN. On approval, the authorization code is recorded directly on the digital invoice.

3. DYNAMIC VIRTUAL ACCOUNTS (QUASAR GATEWAY)

Select *Virtual Account*. The system instantly generates a dedicated, dynamic 10-digit account number (e.g. Wema/Providus/Titan) displaying the store name and exact invoice amount. The customer transfers funds via their mobile banking app or USSD. Invify's webhook listener automatically verifies incoming funds within seconds and marks the invoice **PAID** without manual cashier confirmation.

4. DIRECT BANK TRANSFER

For standard institutional bank transfers. Cashier selects the bank, enters the payer's bank name, sender account name, and bank transaction reference for manual reconciliation.

5. New Invoice & Point of Sale (POS)

Standard POS Checkout Procedure:

1. Tap **New Invoice** on the home dashboard.
2. Add items using any of three methods:
 - **Barcode Scanner:** Scan product barcode via wireless hand scanner or device camera.
 - **Item Grid / Categories:** Tap category pills (e.g. Drinks, Provisions) and tap product cards.
 - **Search Bar:** Type product name or SKU for instant autocomplete.
3. Adjust quantities with + / - buttons. Apply line discounts if authorized.
4. Select customer (optional for walk-ins, required for credit/debt sales).
5. Tap **Proceed to Checkout**, choose Payment Method (Cash, Card, Virtual Account, Transfer), finalize payment, and issue customer receipt.

6. Stock Management & Category Sub-Menu

Accurate inventory control prevents stock-outs, identifies shrink, and computes automated gross profit margins:

ACTIVITY	ACTION & PARAMETERS	RESULT & AUDIT TRAIL
Add Product	Name, Category, Cost Price, Selling Price, Initial Stock, Barcode, Low-Stock Alert Level.	Creates master inventory record with profit margin calculation.
Stock In / Restock	Select item, enter incoming shipment quantity, supplier name, and invoice cost.	Increments stock count, computes weighted average cost, logs purchase entry.
Stock Adjustment	Select item, record damaged, expired, or shrinkage units with reason note.	Decrements stock without recording sales revenue; logged in damage report.
Manage Categories	Create, rename, or color-code product groups (e.g. Toiletries, Beverages).	Updates POS quick-filter buttons and sales breakdown reporting.

7. Inventory Valuation & Stock Reports

Tap **Inventory Report** to generate instant financial stock valuation metrics:

- **Total Stock Items:** Cumulative count of unique active SKUs.
- **Total Inventory Cost Value:** Sum of (Stock On Hand × Cost Price). Represents tied-up capital.
- **Total Retail Market Value:** Sum of (Stock On Hand × Selling Price). Expected gross realization.
- **Projected Gross Profit:** Difference between Market Value and Cost Value.
- **Reorder Alerts:** Highlighted list of items currently at or below their designated reorder threshold.

8. Customer Lookup & Debt Ledgers

Track frequent buyers, corporate accounts, and manage credit sales without paper books:

- **Credit Sales:** Complete checkout under "*On Account / Credit*". The balance is automatically added to the customer's debt ledger.
- **Debt Recovery / Repayments:** Open *Customer Lookup*, search customer, tap "*Record Payment*", input amount and payment channel. The customer's debt balance updates instantly and a payment receipt is issued.
- **Customer Statements:** Generate WhatsApp or PDF account statements showing all historical purchases and repayments.

9. Invoice History & Audit Logs

The **Invoice History** screen provides search filters, multi-staff monitoring, and period totals:

Figure 2: Invoice History & Sales Summary — Multi-criteria search, cashier filters, payment breakdown cards, and expandable invoice audit records.

FILTER CONTROL	OPERATIONAL PURPOSE
Search Invoice / Client	Search by receipt number (e.g. INV-202691-634) or customer phone/name.
Staff Selector	Filter transactions by cashier till to perform individual shift balancing.
Amount Filter	Find invoices matching specific amounts for quick audit verification.
Pending Transfers	Dedicated quick-filter highlighting unconfirmed bank transfers for rapid settlement.
Sales Summary Cards	Instant aggregate metrics for Total Invoiced, Total Collected, Card, Transfer, VA, and Cash.

10. Internal Ledger Analytics

Tap **Finance Analytics** to access the real-time double-entry ledger engine:

Figure 3: Internal Ledger Analytics — Wallet balances, Cash on Hand, Pending Quasar clearances, and weekly revenue trends.

TOTAL WALLET BALANCE

Consolidated digital earnings held across all connected payment routes available for payout.

CASH ON HAND

Real-time calculation of physical cash accumulated across all tills for the active business day.

PENDING QUASAR CLEARANCES

Virtual account payments currently clearing through NIBSS settlement cycles.

11. Cloud Metrics & Offline Queue

Invify is engineered offline-first. The **Cloud Metrics** screen provides comprehensive health diagnostics:

Figure 4: Cloud Metrics Dashboard — Health percentage score, peripheral connections, and offline transaction queue counts.

DIAGNOSTIC METRIC	WHAT IT INDICATES & CASHIER ACTION REQUIRED
Health Score (%)	Overall device and connectivity rating. 100% indicates full operational readiness.
Sync Status	Indicates peer-to-peer data replication with other LAN tills and cloud servers.
Peripherals Grid	Live detection status for Devices, Terminals, MPOS Card Readers, and Thermal Printers.
Offline Operations Queue	Tracks transactions made during internet outages: • Sales Pending: Sales completed locally waiting to upload. • Invoices Pending: Billing records queued for cloud sync. • Inventory Pending: Stock adjustments queued for central synchronization. <i>Note: The queue uploads automatically the instant internet connection is restored.</i>

12. Hardware: Printers & MPOS

Invify interfaces natively with industry-standard POS hardware:

Thermal Receipt Printer Pairing:

1. Power on your 58mm or 80mm Bluetooth / USB thermal receipt printer.
2. On the dashboard, tap **Printer & MPOS**.
3. Tap *Scan Devices*. Select your printer model from the list.
4. Tap *Pair & Connect*. Enter PIN 0000 or 1234 if prompted.
5. Tap **Test Print**. The printer will print a test diagnostics slip verifying connection.

13. Standard Operating Procedures (SOP)

MORNING STORE OPENING SOP

- Power on POS tablet/terminal and thermal printer.
- Verify online or LAN sync indicator in the top bar.
- Open *Printer & MPOS*, perform test print.
- Verify opening cash drawer float in *Finance Analytics*.

NIGHT STORE CLOSING & SHIFT AUDIT

- Verify *Cloud Metrics* to ensure Offline Operations Queue is at 0.
- Open *Invoice History*, select the day's date, record Total Cash, Card, and Virtual Account sales.
- Count physical cash in register drawer; match against *Cash on Hand*.
- Tap **Admin Hub > Close Register Shift** to lock the audit ledger and print the daily Z-Report.

14. Troubleshooting & Frequently Asked Questions

ISSUE OBSERVED	IMMEDIATE REMEDIATION STEPS
Printer does not print receipts	Check paper roll direction. Open <i>Printer & MPOS</i> , verify device shows connected. If disconnected, unpair and tap scan to re-pair.
Internet goes down mid-transaction	No action required. Invify operates 100% offline. Take cash or card payments as usual; sales queue automatically in <i>Cloud Metrics</i> and sync when reconnected.
Customer claims bank transfer sent but till didn't verify	Open <i>Invoice History</i> , tap <i>Pending Transfers</i> . Verify bank reference number. Once confirmed on bank app, supervisor can manually mark invoice as paid.
