- 2. Navigation & Dashboard Layout
- 4. Services Overview & Job Hub
- 6. Job Details & Status Lifecycle
- 8. Payment Channels & Deposit Handling
- 10. Services Analytics & Profitability
- 12. Workshop Standard Operating Procedures

1.

Device Onboarding & Linking

Set up your workshop terminal, bind location telemetry, prevent duplicate email registrations, and synchronize service profiles:

Step-by-Step Service Onboarding Sequence:

1. **Step 0: Welcome & Existing Profile Linking:** Register a new workshop or tap "*LINK DEVICE TO EXISTING PROFILE*". Tapping the link button opens the camera to scan the QR code from your Web Admin Dashboard (under *Fleet > Pair Device*), instantaneously downloading all customer records, service catalog items, and active jobs.
2. **Step 1: Technician & Business Profile:** Enter Lead Technician First Name, Last Name, Email Address, Web Password (minimum 9 characters including uppercase, lowercase, number, and symbol), Workshop Business Name, Contact Phone Number, and optional Agent Referral Code.

Live Email Availability Guard:

When navigating away from the email field or clicking "*NEXT STEP*", the app validates whether the email is already registered. If registered, progression to Step 2 is blocked with an alert linking directly to your existing account.

3. **Step 2: Workshop Location & Hardware Telemetry:** Enter Workshop Street Address, Country, State, and LGA. The system automatically records GPS coordinates and hardware device identifiers to secure multi-counter job dispatch and offline LAN synchronization.
4. **Step 3: Plan Selection & OTP Verification:** Select either a **Free 3-Day Trial** or enter an official **16-Digit Activation Code**. Invify transmits a 6-digit OTP code to your registered Email or WhatsApp. Enter the code to activate your license.

2. Navigation & Dashboard Layout

INDICATOR	VISUAL STATE	WORKSHOP OPERATIONAL FUNCTION
Workshop Brand	Logo + Workshop Name	Displays active trading business name printed on job estimates and receipts.
License Tier	STANDARD / PRO	Indicates active software edition. Tap to view trial days or license renewal.
Shift Clock	YYYY-MM-DD HH:mm	Synchronized audit timestamp used for job intake, technician logging, and payments.
Multi-Till Sync	✓ SYNCED	Peer-to-peer LAN synchronization between front desk reception and workshop floor.
Technician Lock	Shield Icon	One-tap screen lock requiring staff PIN to resume during technician shift handovers.

3. Home Dashboard & Quick Drawer

The Service Mode home screen provides quick-access activity tiles and a sliding Recent Transactions drawer for rapid job lookups:

Figure 1: Service Mode Home Dashboard — Core service navigation tiles and sliding Recent Transactions drawer showing active jobs, client names, and partial/paid tags.

TILE NAME	SHORTCUT / ICON	PRIMARY FUNCTION & WORKSHOP ACTION
Services Dashboard	Hub Grid	Central job control room displaying revenue metrics, active jobs, and ready pickups.
New Job	Plus Check	Intake new repair or service order with customer details, diagnosis, and billing.
All Jobs	List Icon	Master job registry with status filters (Pending, In Progress, Ready, Delivered).
Customers	User Group	Client directory, vehicle/equipment history, phone contacts, and debt balances.
Printer & MPOS	Printer Icon	Pair thermal receipt printers and Bluetooth MPOS card terminals for card payments.
Service Records	Bar Chart	Historical workshop job ledger with date range filters and technician auditing.
Calculator	Number Pad	Desktop workshop calculator for instant parts markup and labour estimations.
Settings	Gear Icon	Workshop profile, logo upload, tax settings, staff PINs, and mode switching.

4. Services Overview & Job Hub

Tap **Services Dashboard** to view live operational metrics and manage active repair queues:

Figure 2: Services Overview — Profitability summary banner, revenue collected vs invoiced, active/ready counts, and recent jobs list with + New Job action.

PROFITABILITY SUMMARY BANNER

Displays total revenue collected vs total invoiced (e.g. ₦16,000.00 / ₦32,000.00 Collected) with immediate visual collection progress.

FINANCIAL KPI TILES

- **Revenue:** Cumulative value of all invoiced jobs.
- **Received:** Cash and bank transfers confirmed in hand.
- **Active:** Jobs currently undergoing diagnosis or active repair.
- **Ready:** Finished jobs awaiting customer collection and balance settlement.

5. New Job Intake & Cost Estimation

How to Book a New Service Job:

1. Tap **New Job** on the home dashboard or the + New Job floating button.
2. Select an existing client from *Customers* or tap + *Add Customer* (Name, Phone, Address).
3. Enter the **Job Title** (e.g. *Maintenance, Brake Pad Replacement, Engine Overhaul*).
4. Enter the detailed **Fault Description** / Diagnostics note (e.g. *Maintenance of washing machine*).
5. Input itemized costs:
 - **Workmanship / Labour Fee:** Fixed or estimated service charge.
 - **Replacement Parts & Materials:** Cost of materials from inventory or third-party suppliers.
6. Set the **Expected Delivery Date**.
7. Record initial deposit if paid (Cash, Card, Virtual Account, Transfer).
8. Tap **Create Job & Print Intake Ticket**.

6. Job Details & Status Lifecycle

Each job maintains an interactive detail sheet for recording progress, payments, and client communication:

Figure 3: Job Details Screen — Header metadata, financial summary card, and interactive status transition bottom sheet modal.

STATUS STAGE	BADGE STYLE	OPERATIONAL DEFINITION & TRIGGER EVENT
PENDING	PENDING	Job created and booked; awaiting technician assignment or replacement parts arrival.
IN_PROGRESS	IN_PROGRESS	Technician is actively working on diagnosis, repair, or fabrication.
READY	READY	Repair completed and quality tested. Client receives automated WhatsApp notification that job is ready for pickup.
DELIVERED	DELIVERED	Client collected equipment, paid outstanding balance in full, and signed handover slip.

7. Bill Breakdown & Audit Logs

Invify provides clear itemized financial breakdowns and an immutable chronological audit trail:

Figure 4: Bill Breakdown & Job Logs — Settled job with Remaining Balance ₦0.00 (PAID), itemized workmanship & parts, and timestamped audit logs.

ITEMIZED BILL BREAKDOWN

Transparently separates service fees from materials: e.g. **Workmanship: ₦15,000.00** and **Brake Pads (x1): ₦8,500.00**, yielding a verifiable Total Cost of **₦23,500.00**.

IMMUTABLE TIMELINE LOGS

Every administrative event is recorded with exact timestamps: *Job Created*, *Payment Received (Cash)*, *Status Changed to READY*, and *Final Settlement*.

8. Payment Channels & Deposit Handling

Service jobs frequently require partial deposits upon intake followed by balance payment at collection. Invify supports all payment channels seamlessly:

Figure 5: Payment Confirmation Screen — Instant confirmation of partial deposit (₦11,750.00 Cash), remaining balance calculation, and print/share options.

PAYMENT CHANNEL	OPERATIONAL WORKFLOW
Cash Payment	Tap <i>Add Payment</i> , select <i>Cash</i> , enter amount tendered. Cashier issues printed thermal slip; Remaining Balance updates immediately.
Card (POS / MPOS)	Customer taps or inserts card into paired MPOS reader. Card authorization code attaches to the job ledger.
Dynamic Virtual Account (Quasar)	Generates an instant 10-digit virtual bank account dedicated to this job ticket. Client transfers from bank app/USSD. Webhook auto-confirms deposit and updates balance.
Direct Bank Transfer	Record incoming transfer with bank name and transaction reference code for manual reconciliation.

9. Service Invoice History & Balances

Tap **Transaction History** or **Service Records** to audit all workshop billings:

Figure 6: Service Invoice History — Sales summary for period (₦32,000.00 Invoiced, ₦16,000.00 Collected), revenue trend curve, and job entries with PARTIAL / PAID status badges.

METRIC CARD	WORKSHOP SIGNIFICANCE
Total Invoiced	Total value of repair jobs booked during the filtered date range.
Total Collected	Actual cash, card, and virtual account funds successfully received.
PARTIAL Badge	Highlights jobs where customer has paid a deposit but an outstanding balance remains prior to vehicle/equipment collection.
PAID Badge	Indicates fully settled repair contracts ready for handover.

10. Services Analytics & Profitability

Tap **Analytics** in the Services Overview to view net workshop profitability:

Figure 7: Services Analytics — Revenue, Expenses, Net Profit KPI cards, revenue trend line, and expense breakdown.

GROSS SERVICE REVENUE

Total funds collected across all completed and in-progress jobs for the active billing cycle.

WORKSHOP EXPENSES

Cost of replacement parts, third-party machining, and operational workshop supplies.

NET SERVICE PROFIT

Real-time calculation: Gross Revenue - Recorded Expenses. Accurately represents workshop earnings.

11. Receipts, Thermal Printing & PDF

- **Thermal Receipt (58mm / 80mm):** Tap *Print Receipt* on the job details screen or payment confirmation dialog to print an instant customer receipt.
- **Digital PDF Invoice:** Tap *Preview / Share PDF* to generate an itemized invoice document branded with your workshop logo, perfect for sharing via WhatsApp or Email.

12. Workshop Standard Operating Procedures

JOB INTAKE & DEPOSIT SOP

- Book customer and record equipment condition and fault description in *New Job*.
- Collect deposit (minimum 50% recommended) and print intake confirmation slip.
- Assign job to technician; status moves to IN_PROGRESS.

JOB COMPLETION & DELIVERY SOP

- Technician completes repair and changes status to READY.
- Customer is notified automatically via WhatsApp.
- At collection, collect outstanding balance via Cash, Card, or Virtual Account. Status moves to DELIVERED.

13. Troubleshooting & FAQ

ISSUE OBSERVED	REMEDATION STEPS
Customer wants to add more parts mid-repair	Open active job in <i>All Jobs</i> , tap <i>Edit Bill Breakdown</i> , add new parts/labour lines, and tap <i>Save & Update Balance</i> .
Client paid deposit via bank transfer but receipt not printed	Open <i>All Jobs</i> , select job, tap <i>Add Payment</i> , record bank transfer reference, and tap <i>Print Receipt</i> .
